

## Hammer-Hitting Poldi Type Brinell Hardness Tester

### Features:

- Portable unit and easy to operate
- Reliable test results
- Comes with high accuracy 20x readout microscope
- Suitable for determining the Brinell Hardness of ferrous and non-ferrous metals and tensile strength of steel. It is widely used in workshop and material warehouse.
- Measuring range: < 450HBS
- Diameter of Steel Ball:  $\varnothing$ 10mm
- Dimensions:  $\varnothing$ 25 x 110mm

### Standard Configuration

- Model HBC Hammer-Hitting Poldi Type Brinell Hardness Tester
- Brinell standardised block 2 pieces
- 20x Reading Microscope 1 piece
